 - Marketing Lead

Problems

- UNH doesn't currently offer any tools to assist students in building their schedule
- Every semester students spend hours planning courses around their commitments
- During meetings, academic advisors waste time evaluating potentially conflicting courses
- This problem is exacerbated for freshman, as they enroll in courses with up to 50 sections

Solution

- Cross platform web-application
- Able to serve over 50 clients/second
- Instantly view multiple personalized schedules
- Save optimal solutions without accounts
- Randomized search for best course availability
- Automatic inclusion of labs & co-requisites

Minimize Copy CRNs Save (Beta)

Potential Restrictions:

- 10248: Only listed colleges in section: Engineering&Physical Sciences
- 13933: Only listed campus in section: Durham
- 10291: Only listed colleges in section: Engineering&Physical Sciences

CRN	Course	Instructor
10248	MATH 425 (06)	Rita Hibschweiler

Value Proposition

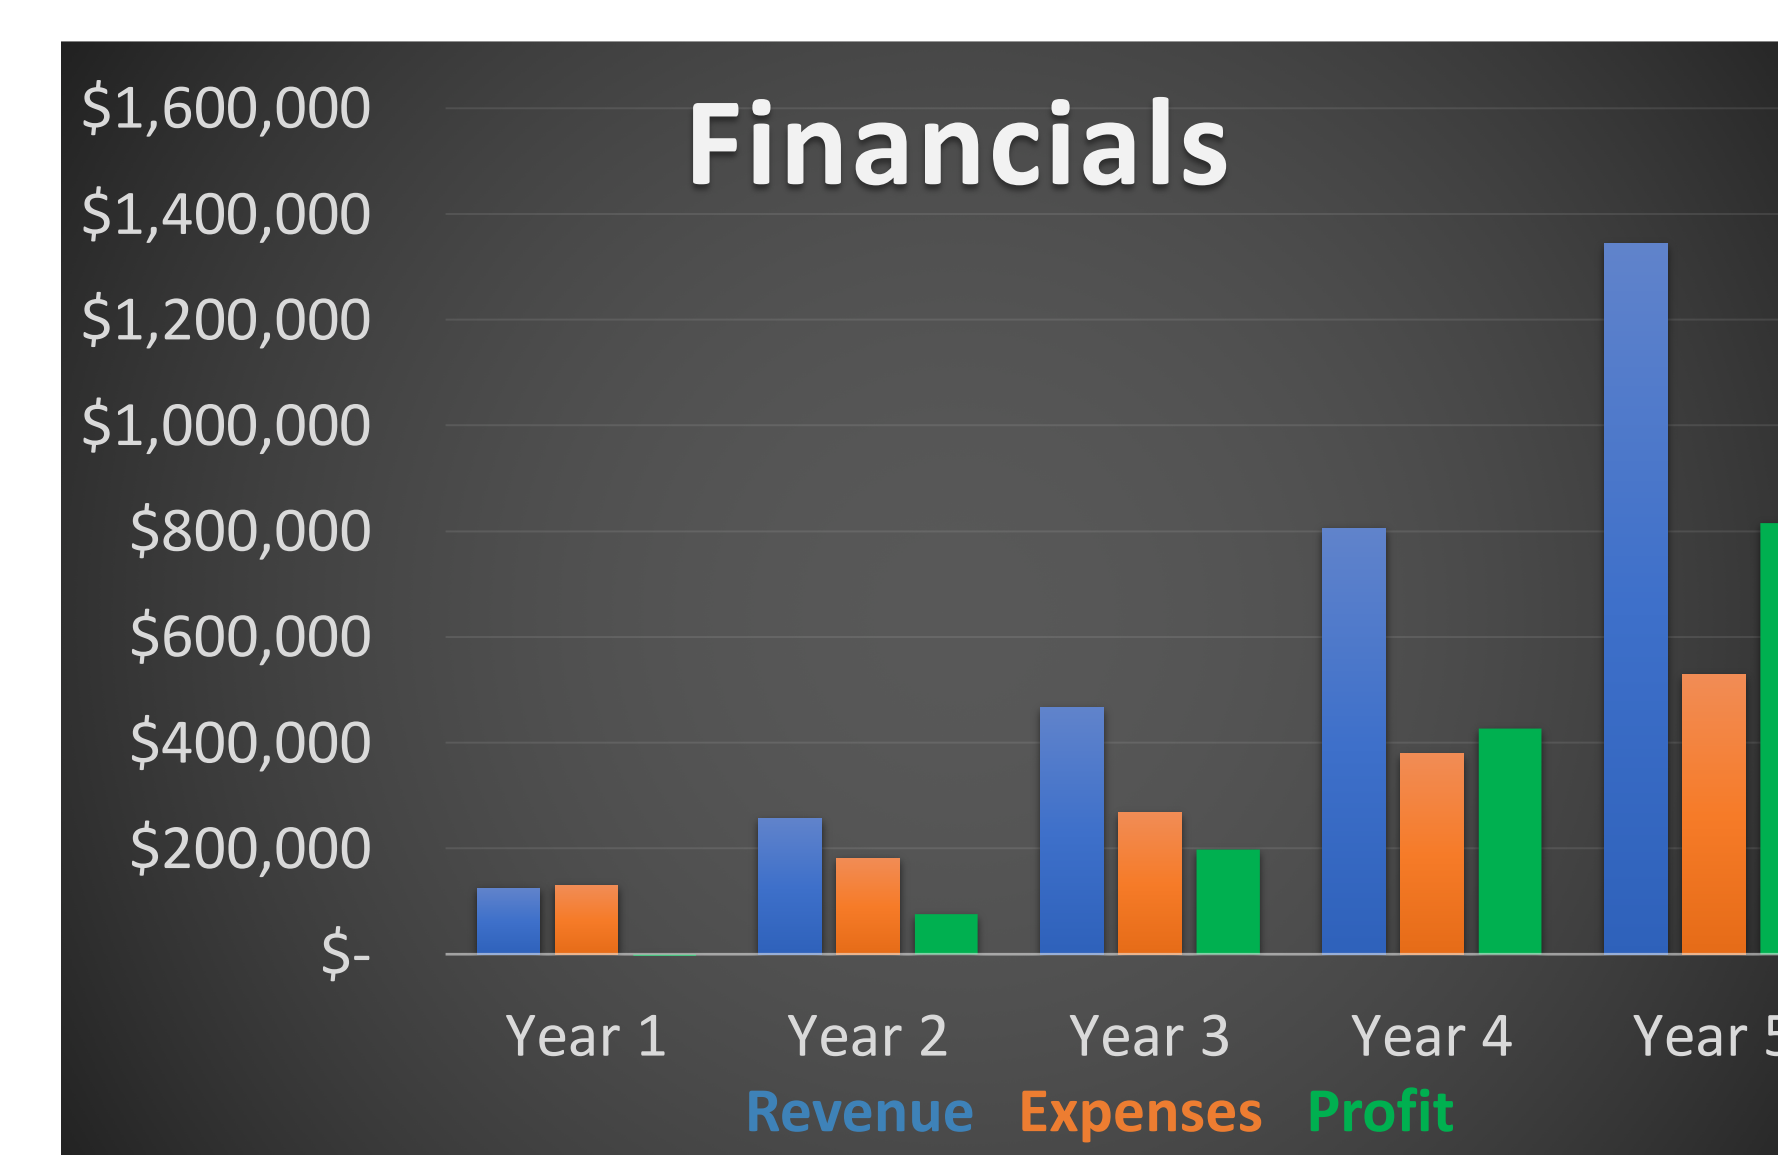

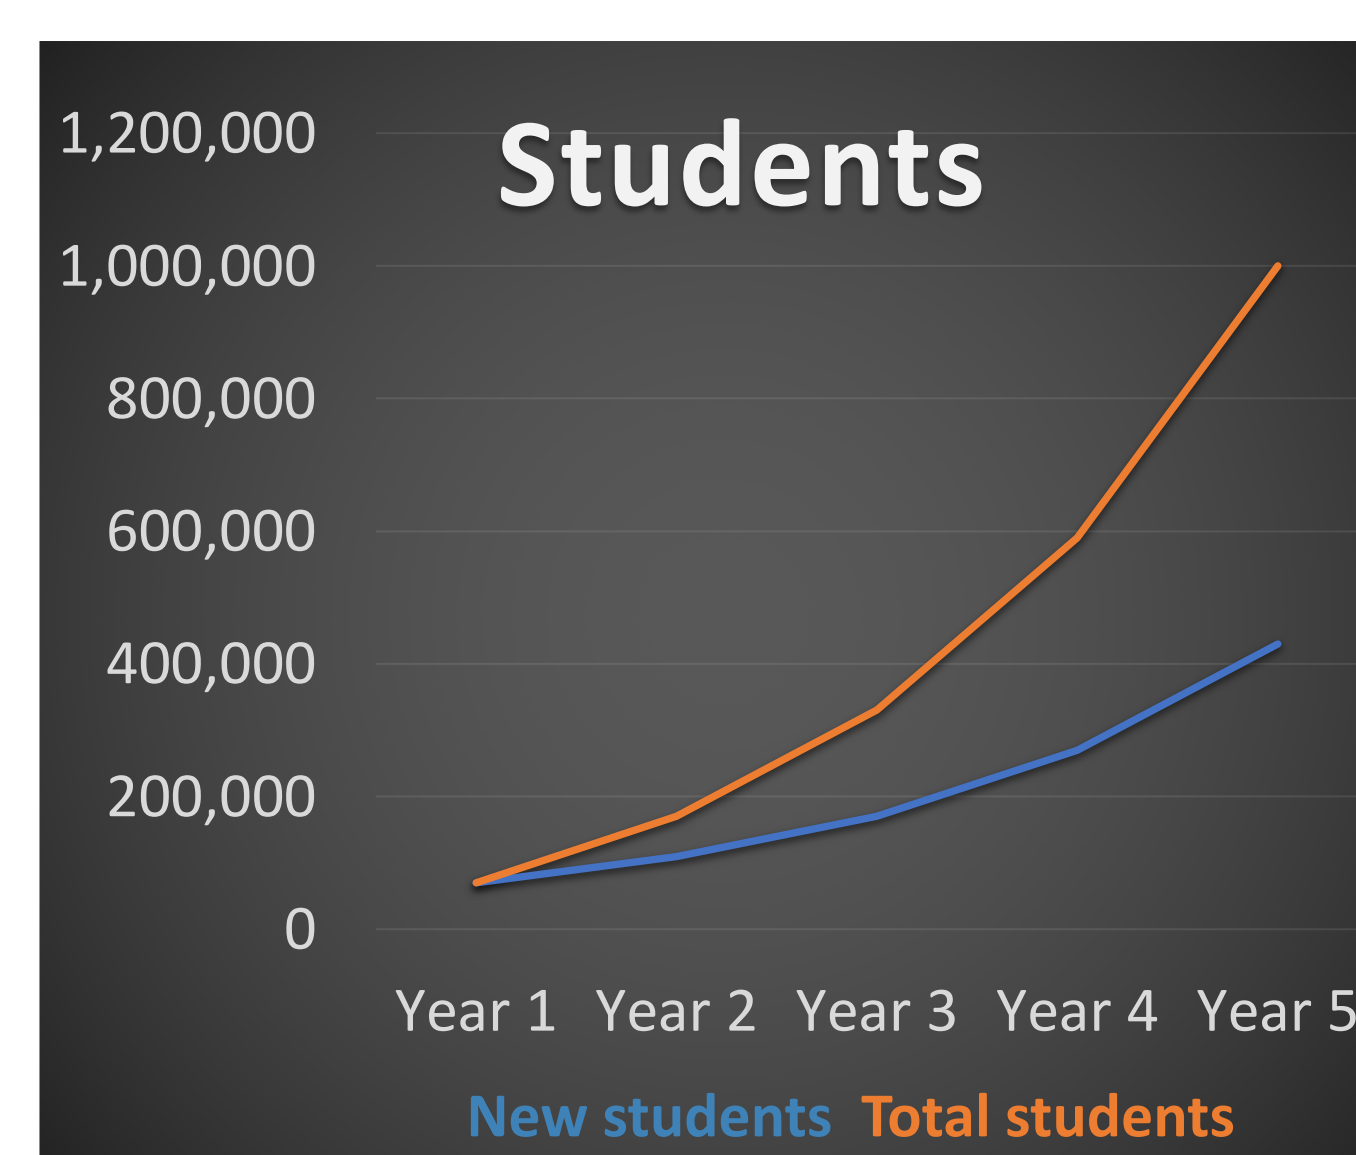

- Enable students to view many tentative schedules in minutes
- Allow advisors to view options for their students in real-time
- Better distribution of student registration across all sections
- Less expensive & more intuitive than existing competition

Sales Growth

- Complete sales cycle by phone and video conferences
- Establish a sales team
- Develop an intelligent web scraper, which would allow our service to expand indefinitely
- Primary: 100 miles from Durham
- Secondary: regional and national

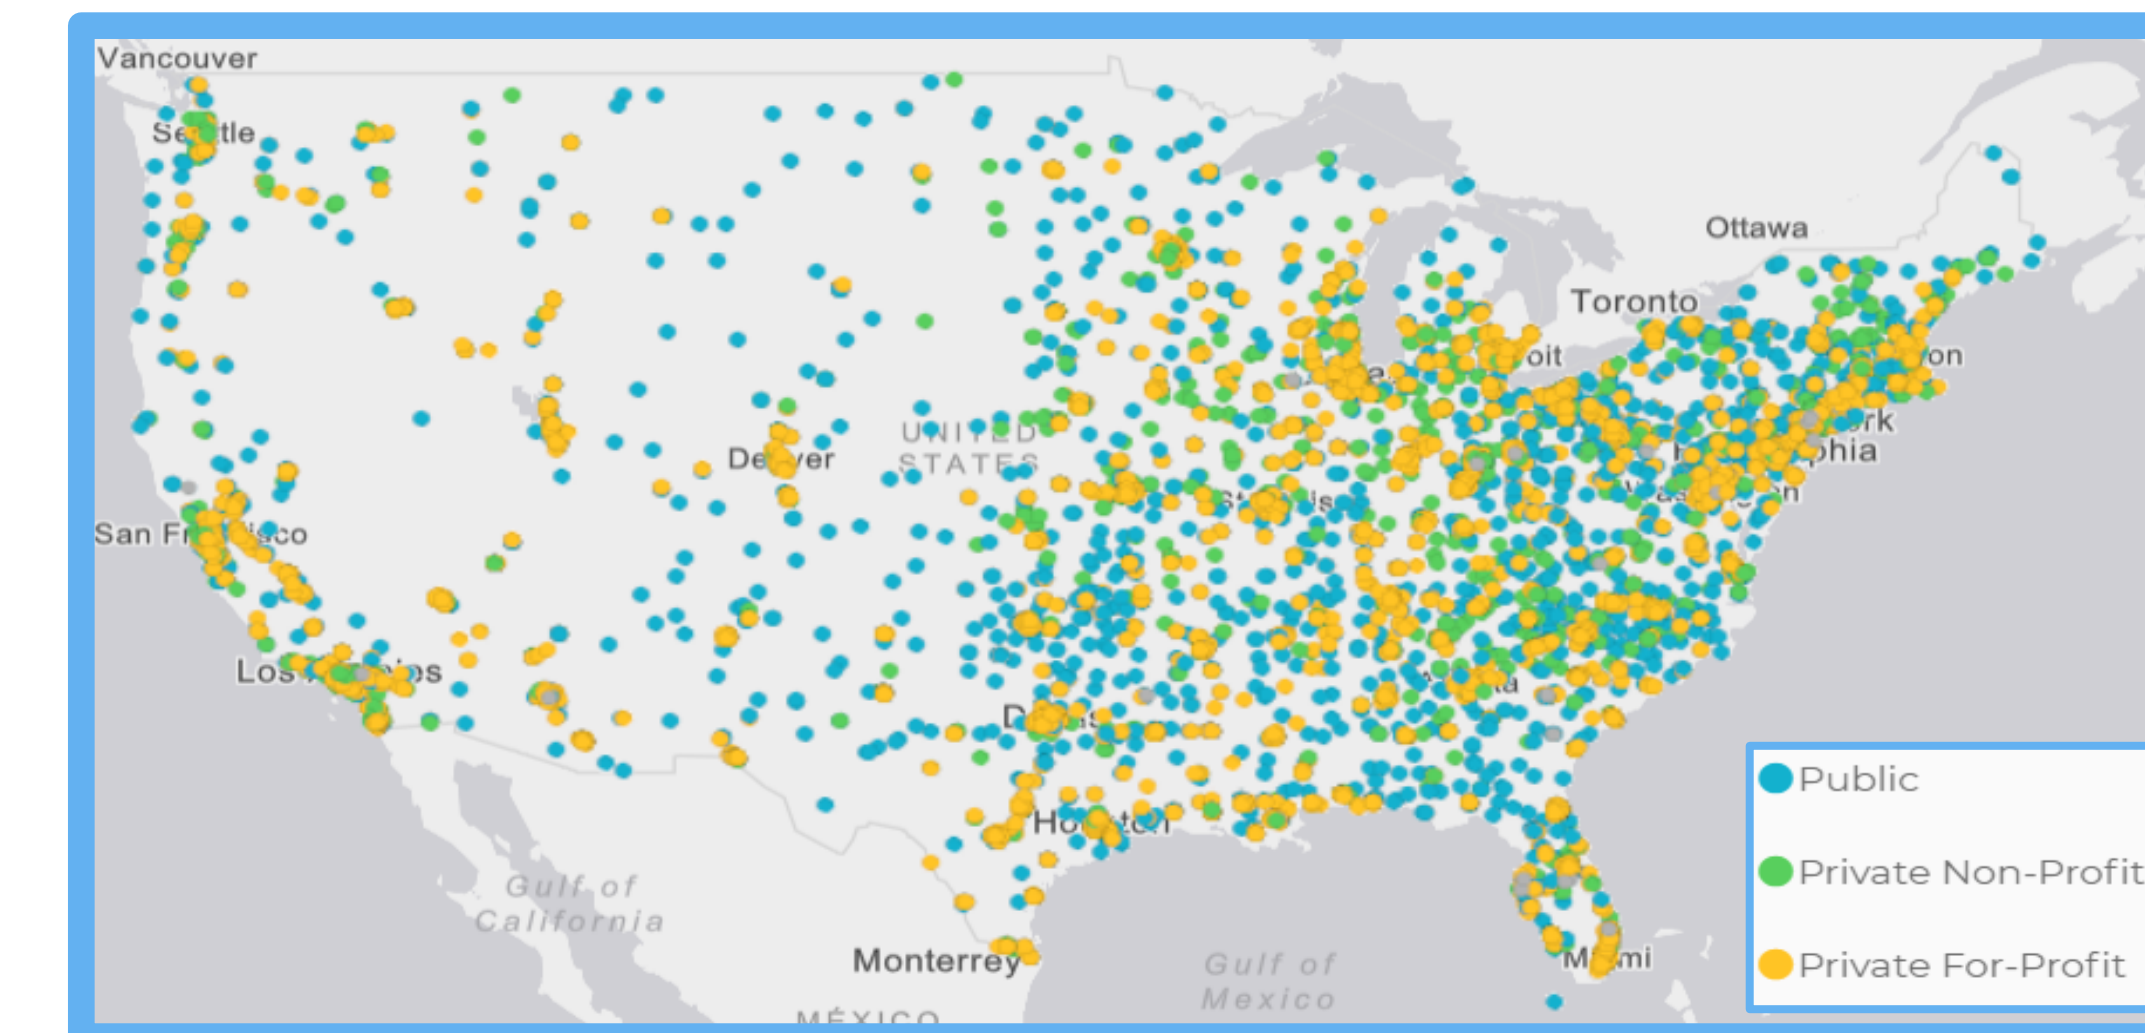

"Clean, easy to use, fast, and efficient, YouScheduler provides our students with both control and choice in building their schedules!"

- Dr. Ted Kirkpatrick, UNH Dean of Students

Market

- 5,300 Colleges and Universities across the US
- Composed by over 20 million students
- Estimated 5 million courses offered across the United States

Revenue Model

- 1 year contract
- 3 year contract
- 6 month MBG
- \$1.00 per student
- \$1.50 per student
- \$3,000 installation
- \$3,000 installation

Expenses

- Marketing: client meeting & advertising
- Salaries: hiring necessary staff (1 per year)
- Servers: Amazon Web Services (yearly rates)
- R&D: further optimize the algorithms
- Installation: database setup & maintenance

Prize Money

- Invest in the development of sales & marketing
- Hardware upgrade of AWS servers
- R&D for AI-like behavior to 'rank' schedules
